

RACHAEL GREEN

An active board member of the United States Green Building Council North Texas Chapter Ms. Green is also the Director of Sustainable Services at Komatsu Architecture and a Licensed Interior Designer. She has over 15 years of design and construction experience, as well as being a LEED AP since 2002. Her areas of expertise in sustainable design are thru past and current project experience. She has been involved with several LEED projects in addition to consulting with municipalities for creating and implementing ordinances that incorporate sustainability. She is actively involved in community outreach and education of the USGBC LEED Green Building Rating System, as well as its impacts within the construction industry. Over the past three years Ms. Green has published several articles regarding this topic. While she provides commitment to and interest in broader sustainability topics and their impacts on the public and private sectors, she offers a diverse skill set and knowledge base. Her project experience includes Green Building (design, technical, and construction) and experience in assisting projects to achieve LEED certification through educating owners and project team members about sustainable building practices and designs. She also provides technical assistance and educational guidance to clients including federal organizations, municipalities, multi-building institutions and private project owners. Recently Ms. Green was the recipient of the Recycling Alliance of Texas Environmental Vision Award (2007). She believes that fundamental training and education are necessary in order to make sustainable design and construction mainstream.
